

SEA LED FY9

DESCRIPTION:

SEA LED® is Cantalupi Lighting LED underwater lights series. SEA LED® FY9 boat LED light is a very low profile built in stainless steel AISI 316L, flush mount, specifically designed for every kind of hull.

Passivation treatment for the front trim ring mounted below the water line. All these submersible marine lights are serviceable from the yacht for a quick and easy inspection of the light body.

SEA LED® FY9 underwater light is very powerful and creates a beautiful halo effect around the boat. High efficiency light is the result of the design of the reflector and the guaranteed quality of each LED.

LIGHT POSITIONING:

In order to create the best lighting effect around the yacht, we will provide advice about quantity, depth of fixture and spacing between each SEA LED®. The effect in the water can vary from straight spears of light to a nice and relaxing halo around the hull simply positioning the lights at the desired distance one from the other. As a general rule we recommend placing the lights at a maximum distance of 4mt one from the other.
