

SEALED MYA13

DESCRIPTION:

The SEALED® MYA series introduces the widest and most innovative range of underwater lights for megayachts. All SEALED® lights are serviceable from the inside the yacht for a quick and easy inspection. SEALED® MYA lights are more powerful to create a beautiful halo effect around the yacht. Two barriers are interposed between the hull and the inside of the yacht to assure a perfect watertight protection in respect of the marine certifications.

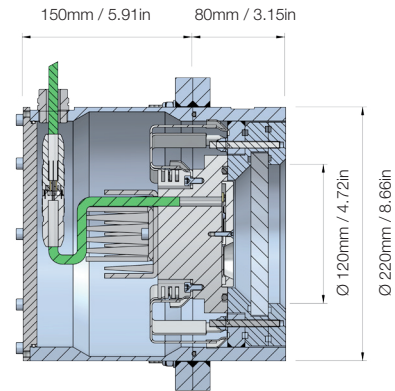

The MYA 'ADJUSTABLE' with its innovative Trim & Lock® system, offers the ideal solution for any angled hulls up to a range of 50° for a perfect flush-mount welding all around the yacht.

ORDER CODE: 90SEALEMYA13SS

LIGHT TECHNICAL DATA:

- Power: 160 W
- Lumens: 13.000
- Power Supply: 24 V DC
- Current / Amp draw: 7 A @ 24 V DC
- Efficiency: 81 Lm/W
- Color Temperature: 5.000 K
- Optional Power Supply: 110 - 220 V AC

LIGHT POSITIONING:

In order to create the best lighting effect around the yacht, we will provide advice about quantity, depth of fixture and spacing between each SEALED®.

The effect in the water can vary from straight spears of light to a nice and relaxing halo around the hull simply positioning the lights at the desired distance one from the other.

As a general rule we recommend placing the lights at a maximum distance of 5mt one from the other.
